

PRODUCT SPECIFICATION DATA SHEET

FIELD BRICK

1. PRODUCT DESCRIPTION:

A Field Brick is virgin raw clay, crushed, screened, moisturized and pressed into a block. It is made from the same ingredients as Mar-Co Mound Clay.

2. CHARACTERISTICS:

A Field Brick is a virgin clay product which is formed and has the following characteristics:

- Rich brownish red colour
- Pliable and formable
- Durable
- High elasticity
- Highly bondable

3. APPLICATION:

Field Bricks are used to build firm clay areas in batters' boxes, coach's boxes and the high wear areas on a pitching mound. For best results, apply a 1" base layer of Mar-Co Mound Clay under the bricks to bond the bottoms of the brick together.

4. SIZE:

4" (w) X 8" (l) X 2 ½" (h)

5. WEIGHT:

7 lbs. per block
