REVOLUTION is a new surfactant chemistry specifically designed for optimization of rootzone moisture and maintenance of fine turf performance.

REVOLUTION is recommended for use on fine turfgrasses such as those found on golf courses, athletic fields, and other highly maintained areas. REVOLUTION will improve rootzone moisture distribution, particularly under stress conditions as a result of high evaporative demand. REVOLUTION will ensure efficient water use and maximize turf quality under stress conditions.

REVOLUTION may be safely applied at any time during the growing season.
