GENERAL INFORMATION

REVOLUTION SWDG Formulation is a new surfactant chemistry specifically designed for optimization of rootzone moisture and maintenance of fine turf performance.

REVOLUTION SWDG is recommended for use on fine turfgrasses such as those found on golf courses, athletic fields, and other highly maintained areas. REVOLUTION SWDG will improve rootzone moisture distribution, particularly under stress conditions as a result of high evaporative demand. REVOLUTION SWDG will ensure efficient water use and maximize turf quality under stress conditions.

REVOLUTION SWDG may be safely applied at any time during the growing season.

DIRECTIONS FOR USE

Standard Program: Apply 3.75lbs/1000 ft² (1.8kg/100m²) of REVOLUTION SWDG. Apply monthly, beginning at least one month prior to the onset of stress conditions. Less than 0.25 inches (6mm) of rainfall or irrigation is necessary to release REVOLUTION SWDG off its carrier. Irrigation should be applied before next mowing to enhance product movement into the soil.
