

PRODUCT SPECIFICATION DATA SHEET

Terra Stone

1. PRODUCT DESCRIPTION:

Terra Stone is a baked clay product, crushed and screened to a uniform aggregate size.

2. CHARACTERISTICS:

Terra Stone is coarse and angular in appearance, and has a rich, orange-red color. It is a low-maintenance product that stays in place when installed.

3. APPLICATION:

Terra Stone is an attractive alternative to bark mulch as a ground cover in planting gardens. In established plantings, Terra Stone may help to prevent weed growth, soil erosion and reduce moisture loss. It is especially effective where wood mulch and bark chips are banned.

4. SIZE:

Typically referred to as 1", Terra Stone aggregates will pass through 1¼" screen, but not less than 5/8" screen.

5. WEIGHT:

Terra Stone weighs approximately 2200 lbs per cubic yard.
