Turf Mark® Ultra Green

High Concentrate Spray Indicator

GENERAL DESCRIPTION:

Turf Mark® Ultra Green is a premium high strength spray pattern indicator that provides a discreet yet visible mark for the application of pesticide and fertilizer spray solutions in professional turf, ornamental, and arbor care.

The efficient use rates of **Turf Mark Ultra Green** provide the professional applicator with greater flexibility to create a visual aid for optimal placement of spray solutions.

Application Tips:

Flat fan spray nozzles are recommended when applying **Turf Mark Ultra Green**. Application equipment should be clean, in good operating condition, and properly calibrated to deliver the recommended spray volume per measured area treated.

Turf Mark Ultra Green provides maximum flexibility at the following use rates:

Spray Tank Volume	Usage Rates
1 - 3 gallons	1/2 - 1 oz
15 - 50 gallons	2 - 4 oz
100 - 200 gallons	6 - 12 oz
300+ gallons	18 - 24 oz

Increasing the total volume of spray solution will enhance the visual marking of nonuniform surfaces, such as longer or thinner stands of turf, or applications made over a broad range of ornamental vegetation and tree canopies.

Hydromulching/Hydroseeding:

Add one (1) quart **Turf Mark Ultra Green** to the water solution in the tank before addition of the mulch mix. Creates a natural green color for up to 1000 gallons of mulch slurry.

Becker Underwood offers for sale the product Drench; there are no warranties of merchantability or fitness for a particular purpose which extend beyond the description of the product in this specification sheet or other product literature.
